

# IAP presentation notes

---

Group EasyPytorch

## Presentation

Intro slide describing the project for at least the first 2 weeks, after that timeline as intro slide

## Structure of the project

- make timeline
- understand the project -> easy first goal -> more complex goals

## General information

- weights & biases for logging, probably not for our project
- BWUniCluster for training, probably not for our project

## Further comments by Prof

"Take complicated PyTorch code and make it easier to read."
